(54) Title: POST HARVEST CONTROL OF GENETICALLY MODIFIED CROP GROWTH EMPLOYING D-AMINO ACID COMPOUNDS

(57) Abstract: The invention relates to a method for preventing and/or suppressing growth of transgenic plants comprising a transgenic expression cassette for a D-amino acid oxidase, which are grown on a field, in subsequent seasons among a population of other plants on said field or neighboring fields based on selective killing of the transgenic plants by application of a D-amino acid (e.g. D-isoleucine) which is metabolized by said D-amino acid in said transgenic plants into a phytotoxic compound.
